2022 -

PUST UNIVERSITY

- Bachelor of Computer science

SKILLS

- Django
- Database Management
- UI/UX Design
- Full Stack Development
- Problem Solving
- Vibe Coding
- html.css.js

PROFILE

I am a developer with expertise in creating contemporary websites utilizing a variety of frontend and backend technologies. My experience encompasses designing, developing, and enhancing efficient, user-friendly websites that operate seamlessly. Additionally, I have played a key role in multiple web development projects, guiding them from the initial stages all the way to completion.

WORK EXPERIENCE

Gado store

2025

- Developed a complete e-commerce platform called "Gado Store" with modern frontend and backend
- Built a real-time online shopping system that allows users to browse, purchase, and manage products efficiently
- Integrated real email notification system for account verification, order updates, and password recovery

As a passionate developer, I have dedicated my career to mastering both frontend and backend technologies, consistently striving to enhance my software development skills and create innovative digital systems. My portfolio includes a range of projects that showcase my expertise. For instance, I developed Gado Store, a modern e-commerce platform designed for efficient product sales and management, and Exam MS, a comprehensive system for examination and student record management. Additionally, I created Job Portal MS, a dynamic recruitment and job search website, and extended this project by developing a mobile app using Flutter with Vibe Coding. Another notable project is CadunApp, a mobile application built with React Native, demonstrating my adaptability across frameworks.

These projects have not only honed my programming abilities but also deepened my understanding of database management, UI/UX design, and system development. My professional journey was significantly enriched by participating in a training programme organized by SAAAV, which provided me with invaluable insights into technology and professional growth. This experience inspired my desire to join the SAAAV Training Programme, where I aim to gain further professional experience, enhance my technical skills, and learn from seasoned industry professionals. I am enthusiastic about actively contributing to the programme's projects and activities, and I am eager to leverage my skills and passion to make a meaningful impact.
