Working with Objects and Layout in Microsoft Word

Working with Objects and Layout in Microsoft Word

- Working with objects and layout in Microsoft Word focuses on how to **design, organize, and visually enhance documents** beyond plain text.
- It involves inserting elements like images, shapes, tables, and controlling how they are positioned on the page to create professional-looking documents.
- Objects are **non-text elements** that you can insert into a document to improve communication and presentation.

Common types of objects:

- **Images/Pictures** – Photos, diagrams, logos
 - **Shapes** – Lines, arrows, rectangles, flowchart symbols
 - **Text Boxes** – Movable text containers
 - **WordArt** – Stylized text
 - **Tables** – Organized rows and columns
 - **Charts/SmartArt** – Visual data and processes
- 👉 These objects help make documents more **engaging, clear, and informative**.

Inserting and Managing Images

Steps to Insert Images

- Go to **Insert Tab**
- Click **Pictures**
- Choose source:
 - This Device
 - Online Pictures
- Select image → Click **Insert**
- **Supported Formats**
- JPG / JPEG
- PNG (transparent background)
- SVG (scalable vector graphics)

Cont..

■ Image Formatting Tools

Image formatting tools allow users to **modify and enhance pictures** to improve document appearance and clarity.

■ **Resize**

Drag the **corner handles** to change image size

Maintains the **original proportions** (prevents distortion)

Avoid using side handles alone, as this may stretch the image

■ **Crop**

Removes **unwanted parts** of an image

Focuses attention on the **important area**

Useful for improving composition and saving space

Styles

Apply **predefined visual effects**, such as:

Borders

Shadows

Reflections

Soft edges

Enhances the **professional look** of the document

Adjustments

Modify image appearance using:

Brightness – controls light/dark levels

Contrast – difference between light and dark areas

Helps improve **image clarity and visibility**

Working with Shapes in Microsoft Word

- Working with shapes in Microsoft Word allows you to **create diagrams, highlight information, and design visually appealing documents**. Shapes are useful for flowcharts, callouts, labels, and structured layouts.

1. Inserting Shapes

- To add a shape:
- Go to **Insert** → **Shapes**
- Choose from options such as:
 - Lines and arrows
 - Rectangles and circles
 - Flowchart symbols
 - Callouts
- 🖱️ Click and drag on the page to draw the shape.

Cont..

- **Formatting Shapes**
- Once inserted, you can customize shapes using the **Shape Format** tab.
-  **Fill (Background Color)**
- Add solid colors, gradients, or pictures
- Helps emphasize important content
-  **Outline**
- Change:
 - Color
 - Thickness (Weight)
 - Style (dashed, solid)

Cont..

✓ Shape Effects

- Apply visual styles like:
 - Shadow
 - Reflection
 - Glow
 - 3D effects

Adding Text to Shapes

- Right-click the shape → **Add Text**
- Type directly inside the shape
- Format text using:
 - Font size, color, style
 - Alignment (center, left, right)
- 👉 Useful for labels, titles, and diagrams.

Cont..

Resizing and Rotating

- Drag **corner handles** to resize proportionally
- Use the **rotation handle** to turn the shape
- Hold **Shift** while resizing to maintain proportions

5. Positioning and Arranging Shapes

-  **Move Shapes**
- Click and drag to reposition
-  **Align Shapes**
- Use:
 - Align Left, Center, Right
 - Align Top, Middle, Bottom
-  **Layering (Order)**
- **Bring Forward** → place above others

Cont..

Grouping Shapes

- Select multiple shapes (hold **Ctrl**)
- Click **Group**
- 👉 Benefits:
- Move multiple shapes as one object
- Maintain layout consistency

What is Text Wrapping?

- Text wrapping defines the relationship between a shape and the surrounding text. Instead of text being blocked by a shape, Word allows text to flow in different ways around it.

Cont..

Text Wrapping with Shapes

- Like images, shapes interact with text:
- **In Line with Text** – behaves like text
- **Square / Tight** – text wraps around shape
- **Behind Text** – shape in background
- **In Front of Text** – overlays text

Creating and Formatting Tables in Microsoft Word

- Microsoft Word tables are powerful tools used to organize information into rows and columns. They help present data clearly in documents such as reports, assignments, and proposals.

What is a Table in MS Word?

A **table** is a grid made of:

- **Rows** (horizontal lines)
- **Columns** (vertical lines)
- **Cells** (intersection of rows and columns)
- Each cell can contain text, numbers, images, or other objects.

Creating a Table in MS Word

Method 1: Insert Table Tool

- Open Microsoft Word
- Go to **Insert** tab
- Click **Table**
- Drag to select rows and columns (e.g., 3×4 table)
- Click to insert

Entering Data in a Table

- Click inside a cell and type
- Use **Tab** key to move to next cell
- Use **Shift + Tab** to go back

Method 2: Insert Table Dialog Box

Insert → Table → **Insert Table**

Enter:

Number of columns

Number of rows

Click **OK**

Method 3: Draw Table

Insert → Table → **Draw Table**

Draw table manually using mouse

Basic Table Formatting

A. Table Design Tab

- You can:
- Change table styles (colors, borders)
- Add shading to rows/columns
- Choose professional templates

B. Layout Tab (Table Tools)

- Used for structure changes:
- Add/Delete rows and columns
- Merge cells (combine cells)
- Split cells (divide a cell into multiple parts)
- Adjust alignment (top, center, bottom)

Formatting Text Inside Tables

- Change font size and style
- Align text (left, center, right)
- Bold headings for clarity

Adjusting Table Size

- You can:
- Drag borders to resize rows/columns
- Use **AutoFit**:
 - AutoFit to Contents
 - AutoFit to Window

Page Layout Tools in Microsoft Word

Header in ms word.

- **What is a Header?**
- A **header** is the top section of every page in a document where you place repeated information.

Common uses:

- Document title
- Chapter name
- Organization name
- Logo

How to insert a Header:

1. Go to **Insert** tab
2. Click **Header**
3. Choose a style
4. Type your content
5. Click outside to exit

Cont..

Footer

- **What is a Footer?**
- A **footer** appears at the bottom of every page.
- **Common uses:**
 - Author name
 - Date
 - Copyright information
 - Contact details

How to insert a Footer:

1. Insert tab → **Footer**
2. Choose a style
3. Enter text
4. Click outside to save

Cont..

Page Numbers

- **What are Page Numbers?**
- Page numbers help readers know the sequence of pages in a document.
- **Common positions:**
- Top of page
- Bottom of page
- Page margins

How to insert Page Numbers:

- Insert tab → **Page Number**
- Choose location (Top / Bottom / Margin)
- Select style (1, 2, 3 or i, ii, iii)

The slide features a light blue background with decorative elements. At the top, there are two solid blue horizontal bars. A blue triangular shape points downwards from the bottom edge of the second bar. On the left side, there are several concentric, curved lines in a light gray color. At the bottom, a blue triangular shape points upwards. The text 'Next Class' is centered in a green, bold, sans-serif font, enclosed within a blue rectangular border.

Next Class
